(1) French contribution to euro area aggregates measures the French resident MFIs monetary liabilities, other than notes and coins, vis-a-vis the euro currency money holding sector (euro area residents other than MFIs and central government) as well as this sector's deposits at the central government (Pc)

(2) National statistics on euro banknote circulation are drawn up taking into account specific accounting conventions adopted at the level of the euro area. The European Central Bank now legally issues 8% of euro banknotes. The remainder is allocated to the National Central Banks as a share of the euro banknotes issue corresponding to its paid-up share in the ECB's capital.
