

## Turnover in retail trade at the end of May 2022

22 June 2022

### Turnover in retail trade rose slightly in May

*Note:* The trend in retail sales does not reflect that of total household consumption: the latter includes other items such as health care, education and rents.

**In May**, turnover in retail trade rose by 0.6% against April (adjusted for seasonal and working-day variations). Over the month, the 2.8% decline in food sales was offset by the 1.8% rise in manufactured goods. The footwear and textile-clothing sectors, which grew by 7.5% and 6.9% respectively, were particularly buoyant, while sales of watches and jewellery and household appliances fell by 5.2% and 3.8% respectively.

**Quarter-on-quarter**, the 1.5% increase in overall sales was mainly driven by the 3.6% growth in manufactured goods, while food sales were down slightly by 1.3%.

**Total manufactured goods and food sales: M/M-1 change (%)**  
Month-on-month change; seasonally and working-day adjusted volume terms

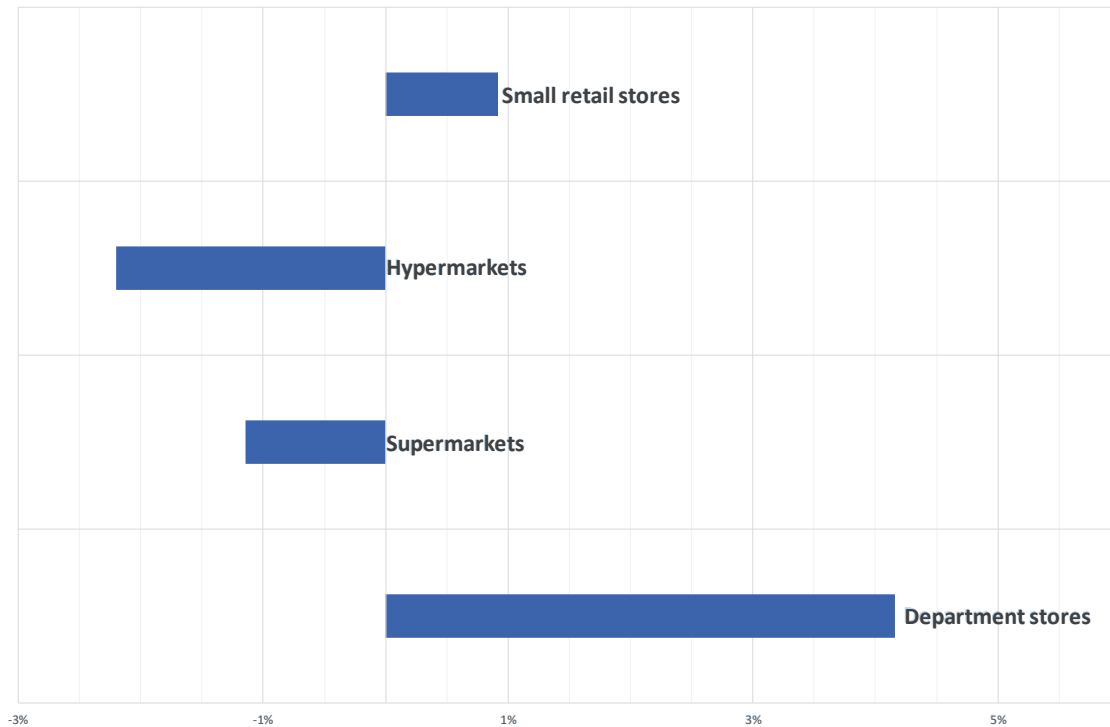

Notes :

- 1) Sectors are classified according to the relative weight of the products included in the total aggregate of retail trade (weights are given on the right scale)
- 2) The aggregated and by sub-sector series are seasonally adjusted on an individual basis: the seasonally adjusted series do not represent the sum of the seasonally adjusted components.

**Retail trade by certain outlet category: M/M-1 change (%)**

Month-on-month change; seasonally and working-day adjusted volume terms

**Total manufactured goods and food**

**Distance sales (including internet sales)**

Provisional data as of the 7th working day following the month under review.

Notes:

- 1) The Fevad and the Banque de France work together to publish the e-commerce figures for France (excluding food). The last published figure covers April 2022. The actual figure for May will be published as soon as it is available.
- 2) The aggregated and by sub-sector series are seasonally adjusted on an individual basis: the seasonally adjusted series do not represent the sum of the seasonally adjusted components.

For further details, see [sectoral level information](#), [methodology](#), [publications calendar](#) and [contacts](#)

Find the series on the website of the Bank of France in [Webstat Banque de France](#) database.
