

Non-financial sector financial transactions – France

Net indebtedness of NFCs rises fairly sharply in Q3, as does that of general government, while net investment by households remains dynamic

NON-FINANCIAL CORPORATIONS*

(a) including direct investment (equity capital and reinvested earnings)

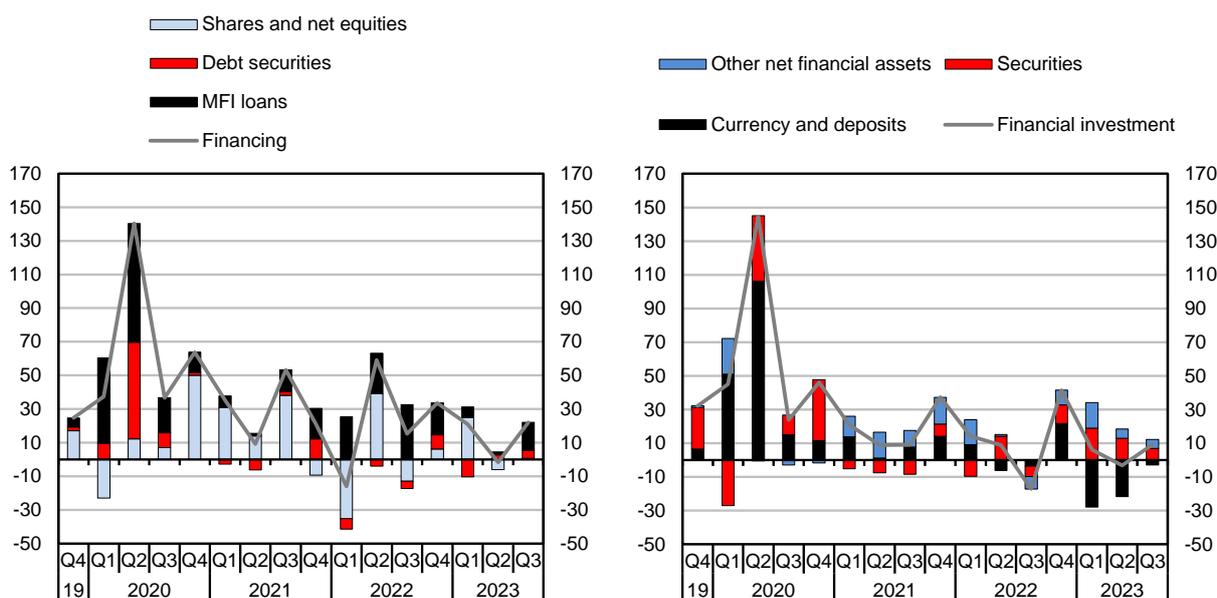

(b) are excluded here several residual items

(c) mainly cross-border intercompany lending/borrowing

Net indebtedness of **non-financial corporations** (NFCs) rises fairly sharply in Q3, with dynamic MFI loans, even though part of the gross indebtedness is used to increase certain financial investments. This is also the case in cumulative terms over the last 12 months on a rolling basis.

(a) are excluded here several residual items

In Q3 2023, **households'** financial investment flows are once again positive. Deposits increase thanks to term accounts, while the contraction in transferable deposits slows. Households also invest again in securities, particularly in unlisted shares and other equities. Their investment in life insurance rises more slowly than in the previous quarter, with more moderate inflows into unit-linked contracts and a near-stabilization on euro funds. On the liabilities side, households' new MFI loans flows remain low.
