

Financing of non-financial corporations – France • December 2020

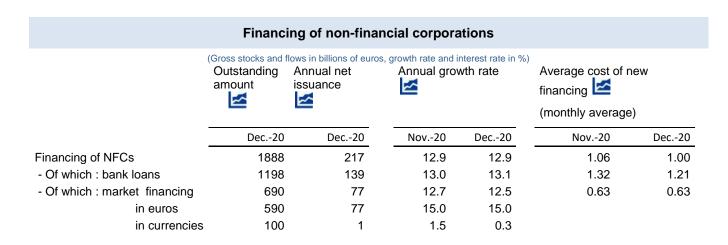

EUROSYSTÈME

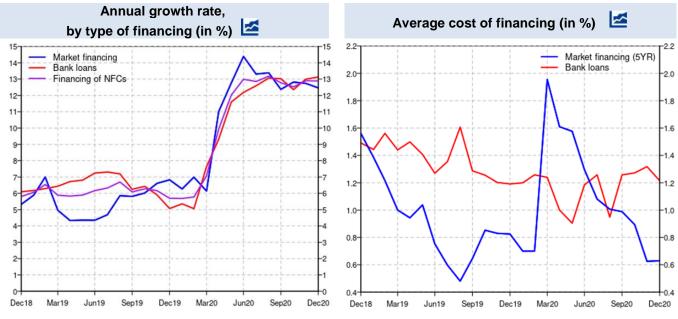

Non-financial corporations debt continued to grow in December

In December, the growth of non-financial corporations market debt as well as that of bank loans remained vigorous: respectively, 12.5% over one year after 12.7% in November and 13.1 after 13.0%. Overall, the annual growth rate of financing of non-financial corporations amounted to 12.9%, as in the previous month.

The rise in non-financial corporations debt since March 2020 was globally accompanied by an increase in their cash flow.

In December, the average 5-year cost of non-financial corporations market financing was stable at 0.63%, back to pre-COVID levels.

Overall non-financial corporate debt also includes bank loans from non-resident credit institutions. This measure can be found in the « Stat Info » related to non-financial sector debt :

https://www.banque-

france.fr/en/statistics/savings/financial-accounts/financial-accounts

The average cost of bank loans to non-financial corporations is computed using the monthly interest rate applied by French banks. This indicator only covers euro-denominated loans with a term of at least one year and with an initial amount of at least one million euros. It excludes revolving term facilities and overdratfs.

The average cost of market financing is calculated on the basis of month-end actuarial rates of return of alive securities. It only covers euro-denominated securities with an initial maturity longer than one year and with a fixed coupon rate. A specific calibration process using the yield curve is performed to align different maturities with a constant 5-year maturity. The average cost of market financing calculation methodology excludes extreme values.

The average cost of bank loans and the average cost of market financing cannot be directly compared since they often differ in their maturity horizon.
