Data for the current account of the euro area

In the 12 months to February 2019, the *current account* recorded a surplus of €335 billion (2.9% of euro area GDP), compared with one of €374 billion (3.3% of euro area GDP) in the 12 months to February 2018. This decline was driven mainly by smaller surpluses for *goods* (down from €324 billion to €278 billion) and *services* (down from €110 billion to €102 billion), and by a larger deficit for *secondary income* (up from €141 billion to €157 billion). These developments were only partly offset by a larger surplus for *primary income* (up from €82 billion to €112 billion).

Data for the financial account of the euro area

In *other investment*, euro area residents' net acquisitions of foreign assets decreased to €141 billion in the 12 months to February 2019 (compared with €175 billion in the 12 months to February 2018), and their net incurrence of liabilities decreased to €96 billion, down from €208 billion in the 12 months to February 2018.

Monetary presentation of the balance of payments

Notes: MFI net external assets as reported in the consolidated MFI balance sheet items statistics. B.o.p. transactions refer only to transactions of non-MFI residents of the euro area. Financial transactions are shown as liabilities net of assets. "Other" includes financial derivatives, other investment and statistical discrepancies.

The monetary presentation of the balance of payments (see Chart 3) shows that euro area MFIs made net purchases of external assets of €150 billion in the 12-month period to February 2019. This increase was driven mainly by the euro area's *current and capital accounts* surplus and, to a lesser extent, by non-MFIs' net inflows in *portfolio investment equity*. This was partly offset by euro area non-MFIs' net outflows in *portfolio investment debt securities*.

In February 2019 the *Eurosystem's* stock of *reserve assets* increased to €732.9 billion, up from €728.4 billion in the previous month (see Table 3). This increase of €4.5 billion was driven mainly by positive price changes (€3.2 billion) and, to a lesser extent, exchange rate changes (€1.0 billion) and net acquisitions of assets (€0.8 billion).
