De Nederlandsche Bank is now live on MAPS

Since 13 June 2022, De Nederlandsche Bank (DNB) has been using MAPS (Market Activities Processing System) to support its treasury and financial market operations, including related risk management tasks and accounting treatment.

MAPS is the Treasury Management System for Central Banks provided by Banque de France (BdF) and Banco de España (BdE) since November 2016. It offers a solution based on the Adenza (formerly known as Calypso) software, spanning front office, back office, risk management, accounting and financial reporting functions. It also includes a comprehensive set of hosting and running services.

With DNB joining BdF, BdE and the Central Bank of Cyprus on the common shared platform, the MAPS user community keeps on expanding. MAPS is open to all members of the European System of Central Banks (ESCB) and next onboarding is foreseen by the end of 2022 with the Central Bank of Malta.

For more information on MAPS-Market Activities Processing System for ESCB’s central banks please go here.

About the Banque de France. The Banque de France is an independent institution with three core missions: monetary strategy, financial stability, and the provision of services to the economy. It contributes to the definition of euro area monetary policy and ensures its implementation in France. It supervises banks and insurance companies, and works to mitigate risks. It also offers a range of economic services to businesses and private individuals.
