Loans to non-financial corporations August 2015

Loans to non-financial corporations slight slow-down

- The annual growth rate of loans to non-financial corporations decreases in August (+ 3.2%, down from + 3.7% in July), as a consequence of a lower increase of the investment loans (+2.3%, down from +2.5%) and the treasury loans (+5.2%, down from +6.2%).
- The average interest rate for new loans decreases for the over €1 million category (1.39%, from 1.45% in July) and is almost unchanged for the up to €1 million category (2.04%, from 2.05%).
- The amount of new loans (seasonally adjusted), higher than in August 2014, decreases, for both the over €1 million category (€12.8 billion, following €14.3 billion in July) and the up to €1 million category (€6.9 billion, following €7.2 billion in July).

Additional information

Non-financial corporations include all companies, whose main activity is the production of goods and non-financial services, excluding sole proprietor and unincorporated partnerships whose assets and liabilities are inseparable from those of the household to which they belong.

The credits referred to in this publication are those granted by resident monetary financial institutions to French non-financial corporations.

Growth rates are calculated by correcting the effects of changes not resulting from economic transactions, particularly write-offs/write-downs, population changes, but take exchange rate effects into account.

The weighted average interest rates and new business volumes are calculated according to the harmonized definitions of the Eurosystem. Published interest rates are the narrowly defined effective rates (NDER). They correspond to the interest component of the Annual percentage rate of charge (APRC).
