Additional information

Non-financial corporations include all companies whose main activity is the production of goods and non-financial services, excluding sole proprietor and unincorporated partnerships.

Calculations are made with the aim to give the best possible image of the evolution of the lending activity:

- Loans that have been securitized or sold by credit institutions are considered as remaining in their books
- Accounting changes that are not reflecting economic transactions, in particular write-offs/write-downs, are eliminated
- The impact of statistical modifications in the scope of the MFI sector (e.g. the reclassification of an entity from the non-financial corporations sector to the government sector) is also eliminated
- As FX hedges are unknown, loans in foreign currencies are however taken into account at their face value in Euros at the end of the month
