

Performance of investment funds – France • January 2019

Fund performance is less negative in January

The annual performance of funds remains globally negative in January, but to a lesser extent than in the previous month. Non-monetary market funds performance stands at -3.9% after -5.2% in December. This is due in particular to the slight recovery of equity funds (-9.1% after -12.0% in December), whose average performance remains however below the Stoxx Europe 600 index. Employee savings funds (-5.7% after -6.9%) and mixed funds (-4.8% after -5.9%) also benefits from the less bearish market. Similarly, the performance of bond funds gets less negative (-0.3% in January after -0.9% in December).

The performance of money market funds is almost stable (-0.24% or +4 basis points compared to December 2018).

Additional information

The different categories of funds under review are defined by the Autorité des Marchés Financiers (AMF – French Financial Markets Authority). The classification of each fund is based on its real risk exposure. The definition of the exposure and the risk thresholds for each category are developed in AMF Instructions 2011-19, 2011-20 and 2011-21.

The **Stoxx 600 index** comprises 600 companies residing in 18 European countries.

The **Barclays index** comprises sovereign and quasi-sovereign bonds, corporate bonds and asset-backed securities. It includes securities denominated in 24 currencies, issued from developed and emerging markets. The rating of the securities is “investment grade” with residual maturity over one year.

The performance of these indexes is measured as the total return (price variation and reinvested dividends/coupons).
