

Statistical release

5 October 2023

Euro area quarterly balance of payments and international investment position: second quarter of 2023

- Current account surplus at €34 billion (0.2% of euro area GDP) in four quarters to second quarter of 2023, after a €129 billion surplus (1.0% of GDP) a year earlier
- Geographical counterparts: largest surpluses vis-à-vis *United Kingdom* (€156 billion) and *Switzerland* (€74 billion) and largest bilateral current account deficits vis-à-vis *China* (€156 billion) and the *United States* (€27 billion)
- International investment position showed net assets of €265 billion (1.9% of euro area GDP) at the end of second quarter of 2023

Current account

The *current account* of the euro area recorded a surplus of €34 billion (0.2% of euro area GDP) in the four quarters to the second quarter of 2023, after recording a surplus of €129 billion (1.0% of GDP) a year earlier (Table 1). This decline was mainly driven by a fall in the *primary income* surplus from €76 billion to €7 billion and by reductions in the surpluses for *goods* (down from €74 billion to €56 billion) and *services* (down from €142 billion to €128 billion). These developments were partly offset by a decline in the deficit in *secondary income* (down from €163 billion to €156 billion).

The lower surplus for *services* was mainly due to a smaller surplus for *transport services* (from €23 billion to €11 billion) and widening deficits for *other business services* (from €47 billion to €54 billion) and *other services* (from €28 billion to €58 billion). Larger surpluses were recorded for *travel services* (from €42 billion to €57 billion), *telecommunication, computer and information services* (from €144 billion to €153 billion) and *insurance, pension and financial services* (from €8 billion to €17 billion).

**Euro area quarterly balance of payments and international investment position:
second quarter of 2023**

The decrease in the *primary income* surplus was mainly due to a larger deficit in *portfolio equity income* (from €95 billion to €138 billion), a lower surplus in *direct investment income* (from €75 billion to €52 billion) and a decline in the surplus for *portfolio debt income* (from €49 billion to €44 billion).

Data for the current account of the euro area

Data on the geographical counterparts of the euro area current account (Chart 1) show that, in the four quarters to the second quarter of 2023, the euro area recorded its largest bilateral surpluses vis-à-vis the *United Kingdom* (€156 billion, down from €165 billion) and *Switzerland* (€74 billion, up from €61 billion). The largest bilateral deficits were recorded vis-à-vis *China* (€156 billion, up from €123 billion a year earlier), the *United States* (€27 billion, after a surplus of €28 billion) and *Russia* (€22 billion, down from €68 billion).

**Euro area quarterly balance of payments and international investment position:
second quarter of 2023**

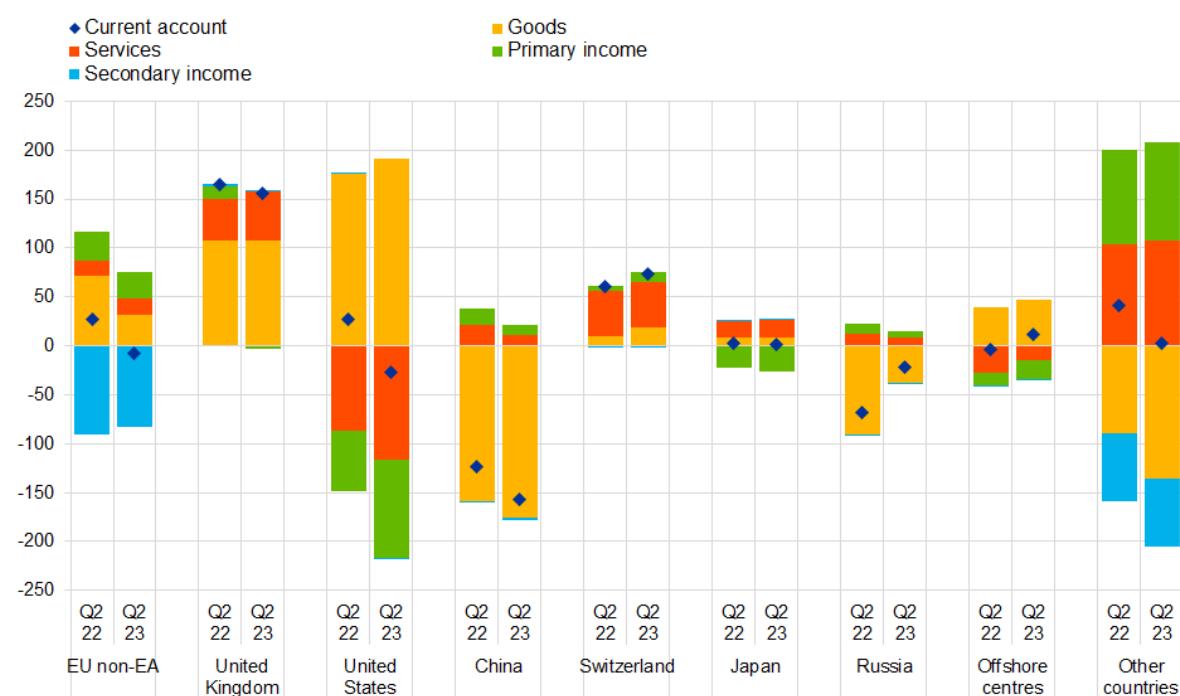

The most significant changes in the geographical components of the current account in the four quarters to the second quarter of 2023 relative to the previous year were as follows. The deficit for *goods* vis-à-vis *Russia* fell from €91 billion to €37 billion, while the deficit for *goods* vis-à-vis the residual group of *other countries* rose from €89 billion to €136 billion. This was partly due to a larger goods deficit with Norway (up from €46 billion to €71 billion) and increased imports from countries within the Organization of the Petroleum Exporting Countries. The surplus vis-à-vis *EU Member States and EU institutions outside the euro area* decreased from €71 billion to €32 billion, while the deficit vis-à-vis *China* increased from €159 billion to €176 billion.

In services, the deficit vis-à-vis the *United States* increased (from €87 billion to €116 billion), while the deficit vis-à-vis *offshore centres* decreased (from €27 billion to €14 billion). In *primary income*, a larger deficit was recorded vis-à-vis the *United States* (up from €62 billion to €101 billion), while the *primary income* balance vis-à-vis the *United Kingdom* switched from a surplus of €13 billion to a deficit of €3 billion.

Data for the net international investment position of the euro area

The €71 billion increase in net assets reflected contributions from all major investment components. Larger net assets were recorded in *direct investment* (up from €2.30 trillion to €2.34 trillion) and *portfolio debt* (up from €1.18 trillion to €1.21 trillion), while net liabilities declined in *portfolio equity* (down from €3.25 trillion to €3.22 trillion) and *other investment* (down from €1.15 trillion to €1.13 trillion).

Notes: "Equity" comprises equity and investment fund shares. Net financial derivatives are reported under assets. "Other volume changes" mainly reflect reclassifications and data enhancements. Discrepancies between totals and their components may arise from rounding.

Data for the international investment position of the euro area

The developments in the euro area's net international investment position in the second quarter of 2023 were driven mainly by transactions and positive net flows from price changes. These were partly offset by exchange rate changes and other volume changes (Table 2 and Chart 3).

The increase in net assets for *direct investment* was mostly driven by positive net flows for price changes and transactions, as the disinvestment was bigger in liabilities than in assets (Table 2). The decrease in net liabilities for *portfolio equity* resulted mostly from price changes, which were partially offset by negative exchange rate changes and other volume changes. In *portfolio debt*, the changes were mainly explained by positive net flows owing to transactions. The decrease in *other investment* net liabilities was mostly due to other volume changes.

Notes

- Data are neither seasonally nor working day-adjusted. Ratios to GDP (including in the charts) refer to four-quarter sums of non-seasonally and non-working day-adjusted GDP figures.
- Hyperlinks in this press release lead to data that may change with subsequent releases as a result of revisions.

¹ On 27 October 2023 there will be a second release of the quarterly balance of payments and international investment position data (reference data up to the second quarter of 2023) with revisions to data for periods since at least the first quarter of 2013. This second release will not include a press or statistical release and is aimed at ensuring consistency between the balance of payments/international investment position and the euro area sector accounts.
