## **The Bank of Finland is now live on MAPS, the Treasury Management System designed by and for Central Banks**

On April 20<sup>th</sup>, 2026, the Bank of Finland (BoF) started using MAPS (Market Activities Processing System) to support its treasury and financial market operations, including the tasks related to risk management and accounting.

Since November 2016, MAPS is the Treasury Management System designed by Central Banks for Central Banks provided by Banque de France (BdF) and Banco de España (BdE) to the European System of Central Banks.

It offers a solution based on Nasdaq-Calypto software, which spans front office, back office, risk management, accounting and financial reporting functions.

MAPS, as Global offer, includes a comprehensive set of hosting operational and evolution support services.

With the BoF joining BdF, BdE, the Central Bank of Cyprus, De Nederlandsche Bank, the Central Bank of Malta and the Central Bank of Ireland the MAPS common shared platform, the MAPS user community keeps on expanding.

MAPS is open to all members of the European System of Central Banks (ESCB) and more central banks are looking at implementing MAPS in forthcoming years.

### **About the Banque de France:**

As an independent institution, **the Banque de France** has three main tasks: monetary strategy, financial stability, and services to the economy. It contributes to the definition of monetary policy in the euro area and its implementation in France; it supervises banks and insurance companies and ensures the sound management of risk; it provides many services to businesses and individuals.
