In Q2 2023, **households'** financial investment flows accelerate compared with the previous quarter. Deposits slow, due to more moderate passbook savings. Investment in securities picks up, due to the strength of non-MMF investment fund shares. Households' investment in life insurance is slightly higher than in Q1, with investment in unit-linked funds remaining dynamic, and a smaller outflow from euro funds. On the liabilities side, households' MFI loans financing is weak.
