

December 6th 2024

Loans to individuals – France • October 2024

Housing loans production, encouraged by a further fall in interest rates, rose back above €10 billion in October

- **SA production of housing loans (excluding renegotiations) came to €10.4 bn in October**, up on the previous month (€9.6 bn in September), continuing the recovery trend since the low point of March 2024.
- **The average interest rate on new housing loans continued to fall:** 3.51% in October after 3.56% in September for transactions excluding renegotiations, down 66 basis points on the peak of 4.17% in January 2024.
- Use of the HCSF flexibility margin, at 14.9%, remained significantly below the overall envelope of 20% available to banks.

Production of new housing loans

(Monthly seasonally adjusted new loans in €bn)

Interest rates on housing loans, all maturities (excluding renegotiations)

(Narrowly defined effective rate, average weighted by long and short term flows, in %)

Production of new loans (excluding overdrafts, monthly flows seasonally adjusted (a))

(volumes in €bn, proportion in percentage)

	Aug-24	Sept-24 (r)	Oct-24 (p)
- housing loans	10.8	11.4	12.4
of which housing loans excluding renegotiations	9.4	9.6	10.4
- proportion of renegotiation (not seasonally adjusted) in % (c)	13.7	15.6	16.4
- loans for consumption purposes (b)	5.3	5.7	5.9

Interest rates on new loans (narrow defined effective rate, monthly average)

(in percentage)

	Aug-24	Sept-24 (r)	Oct-24 (p)
- housing loans	3.38	3.33	3.28
of which housing loans long term and fixed rates	3.36	3.31	3.25
of which housing loans short term and floating rates	3.90	3.94	4.06
of which housing loans excluding renegotiations	3.59	3.56	3.51
- loans for consumption purposes (b)	6.44	6.41	6.46
- overdrafts for individuals (d)	7.25	7.37	7.38

(a) Parameters for seasonal adjustment are updated each month, taking into account monthly data under review; (b) Excluding revolving loans. Loans for splitted-cost payments (mainly "loans granted on market place" and "extended credit-card credits" are included into consumption loans; (c) Ratio of renegotiated loans on housing loans, both not seasonally adjusted (d) Overdrafts: negative balance of ordinary accounts + commercial credits + factoring + cash credits without fixed repayment schedule (including mobilization of revolving loans). (r) Revised data; (p) Provisional data

Renegotiated loans are loans where at least one of the terms of the initial contract is modified with the active participation of the borrower, giving rise to the declaration of a new contract. They include in particular loans for which the insurance contract has been modified (since February 2022 the Lemoine law authorizes the termination at any time of the borrower's insurance contracts, without any notice period or fees or penalties) even if the other characteristics of the loan remain unchanged.

Share of new housing loans not meeting HCSF lending criteria thresholds in total production*

(in percentage)

* Total new housing loan production excluding renegotiations and excluding bridging loans

Outstanding amounts and annual growth rates (without seasonal adjustment)

(Outstanding amounts in €bn, annual growth rates in %)

	End-of-month level			Annual growth rate

Credits at the point of sale (of which buy now pay later loans)	20.0	21.2	22.9	21.1	21.2	2.9	5.6
Other treasury loans	12.8	12.5	11.5	11.3	11.5	-12.8	-10.4
loans <i>Ménages = Particuliers + entrepreneurs individuels + institutions sans but lucratif au service des ménages. Le taux de croissance annuel des encours de crédits à l'habitat aux ménages en France s'établit à -0,7 % en octobre 2024 et à -0,9 % pour les seuls particuliers.</i>	23.4	25.1	22.7	26.8	26.8	10.2	14.3

Note: **Revolving credit** (formerly called revolving credit) is a form of credit that consists of making available to a borrower a sum of money that can be reused as it is repaid to finance non-predefined purchases.

Within credit for consumption, the most dynamic components are leasing (+13.8% year-on-year in September 2024) and, to a lesser extent, revolving credit (+4.2%). Conversely, overdrafts continue to shrink (-6.3% year-on-year in September), as do other treasury loans (-10.4%).

Interest rate (narrowly defined) on new revolving loans by type of credit institution, %

Distribution channels of revolving loans, in % of the total outstanding amount of revolving credits

Additional information

- 'Individuals' are a subset of the 'households' economic sector, which also includes sole proprietors and unincorporated partnerships and NPISH.
- The outstanding growth rates are calculated from monthly changes in stocks (including sales and securitization) by correcting from modifications that do not reflect economic changes, especially, the accounting derecognition of loans from the MFI's statistical balance sheet due to write-offs/write-downs. Conversely, exchange rate effects are taken into account without any change for technical reasons.
- Monthly growth rates are those of new loans agreed, i.e. disbursed. Nevertheless, new loan production represents new loans granted, even when they are not actually disbursed to the borrower, in accordance with the Eurosystem harmonised methodology. For this reason, the production of new loans differs from monthly changes in outstanding loans. Indeed, on the one hand, outstanding loans are recorded after the effective disbursement of funds and, on the other hand, they are reduced by the amortization of old loans.
- The weighted average rates and new business volumes are calculated according to the harmonized definitions of the Eurosystem. Published rates are the narrowly defined effective rate (NDER). They correspond to the interest component of the Annual Percentage Rate of Charge (APRC). Renegotiated loans also include external mortgage repurchases.
